

GO Terms

- | | | | |
|------------------------------------|-----------------------------------------|------------------------------------------|-----------------------------------------------------------------|
| developmental process | anatomical structure development | system development | homophilic cell adhesion via plasma membrane adhesion molecules |
| multicellular organism development | nervous system development | protein binding | multicellular organismal process |
| membrane | cell differentiation | cellular developmental process | regulation of cellular process |
| cell junction | cell periphery | plasma membrane | cell-cell adhesion via plasma-membrane adhesion molecules |
| tissue development | anchoring junction | cytoplasm | cell adhesion |
| intracellular signal transduction | animal organ development | cell communication | kinase binding |
| cell-cell junction | signaling | regulation of cellular metabolic process | localization |
| neurogenesis | regulation of primary metabolic process | | |
